Remarkable Case-Charging a Hu man Soda Fount-A Case of Inter-terest to the Medical Facuity.

Zaneaville, Ouio, correspondence of the Cincinnati Commercial: Mr. Joseph R. He injected into his bowels large quantities of solutions of bicarbonate of sods and tartaric acid, and simultaneously had the patient drink large quantities of it, thus creating antagonistic forces in the bowels, which, by distentiou, pulled in opposite directicus. The gas thus generated was kept from escaping by proper means until it had done its work effectually. The pressure of gas must have been heavy, for, when the covering was remead from his the covering was removed from his mouth the froth and foam rushed out with grea force, the liquid being thrown a di tance of ten feet across the room and against th wall, but it had completely liberated the bowels from their invaginated condition, and saved a life that had been given up by the family and friends. Mr. Thomas himself had given up all hopes of recovery, and, in fact, his physician had expressed the opinion that the end was near. His relief is a source

I have not yet seen it, as it is doubtless at my home, in Lancashire. I did not omit notice of the south, for I said a good deal about Texas. As for your old slave south, you will have few Englishmen settling there so long as the old temper of your people c ntinues to exist. We hear of the ill treatment of the negro, and of the hostile disposition of many of your white population toward families who come from the north. I know not how much of this is true, but so long as the belief in its truth ex-ists your southern States will make small progress in comparison with the north and west. You have soil and climate, but you west. You have soil and climate, but you will not easily or speedily shake off the old curse, and men from Europe will prefer a country where slavery has not prevailed, and where the negro is not a considerable portion of your population. They will think the north and west offer a better field for them, with more real freedom and less of the elements of disorder. I wish all your States a growing prosperity."
